

Notes:

- Boxes highlighted in orange should only be shown when in enthusiast mode, but always provide a toggle to switch over from basic to enthusiast. If switching over, flag recipe and circle back around on prompts when complete with tree.
- Grain, Hops, and Yeast options should have a local copy and be updated from an online database when possible to keep them up to date and curated.
- File should autosave at every box (preferably upon ANY change). Final file should be written any time user chooses to save and all intermediate saves should be erased from memory.
- Autofill all prompts based on expected values (highlight where default values used so that they can keep track of what they have changed).
